

Open Science Compliance Form

The purpose of this form is to allow authors to inform to what extent their manuscript complies with communication practices of open science.

Author(s):

Article title:

Preprints

Was the manuscript made available as a preprint?

() Yes Preprint server name: _____

Preprint DOI: _____

() No

Availability of research data and other materials

Authors are encouraged to make all content (data, computer programs and other materials) on which the manuscript is based available before or at the time of publication. Exceptions are allowed when there are legal or ethical issues. The objective is to facilitate evaluation of the manuscript and, if it is accepted, contribute to preservation and reuse of the content and to the reproducibility of the research.

Is the content underlying the text of the manuscript already available in its entirety and without restrictions, or will it be at the time of publication?

() Yes () The content will be available at the time the article is published.

() The content is already available.

Titles and respective URLs, access numbers or DOIs of the files containing content underlying the text of the article (use one line for each piece of information):

☐ No ☐ Data available if requested by the referees.

☐ After publication, the data will be available upon request – conditions justified in the manuscript.

☐ The data cannot be made publicly available. Justification:

Transparency in peer review

Do the author(s) consent to publication of the peer review evaluations of the manuscript?

☐ Yes

☐ No

☐ Maybe. To be defined later.

When articles have more than one author, the form must be signed by the corresponding author, who is responsible for ensuring the other author(s) agree with the answers given above.
